## **Construction Contract Claims, Changes, and Dispute Resolution Inside the Insurance Industry** **- Second Edition**

Few building contracts of any size reach completion without a range of often substantial claims being made. But many claims are ill-founded, often because the basic principles are misunderstood. This highly regarded book examines the legal basis of claims for additional payment, and what can and cannot be allowed by the consultants under the main forms of building contract. It also includes chapters on the preparation and negotiation of claims, and the quantity surveyor's role. This third edition covers all the main JCT contracts, including the latest amendments, and uses JCT 80 as the basis to highlight important differences in the other forms. It also covers the subcontract forms NSC/C, NAM/C and DOM/1, together with the ACA Form and its subcontract, and GC/Works/1 Edition 3. The subjects of liquidated damages, global claims, causation and concurrency have been given greater importance for this edition, recent legislation has been incorporated and the number of case references has almost doubled. This third edition will continue to be essential reading for all architects and quantity surveyors. It will also prove invaluable to contractors by showing them how to present and justify valid claims. Practical Guide to Construction Contract Surety Claims, Second Edition provides clear guidance on the methods, procedures and case law surrounding the surety process. Whether you represent the surety, principal, or obligee, this one-of-a-kind reference will provide you with the indispensable, practical guidance and reliable tools you need to manage the surety process. Practical Guide to Construction Contract Surety Claims, Second Edition is logically organized around the various types of bonds - payment bond, bid bond, performance bond - as well as the claims that are asserted against those bonds, and the methods of investigation and resolution

of those claims. It covers in detail the surety's options for resolving performance bond claims, including: Tender Completion by the obligee Completion by surety Financing the principal This book also addresses matters that affect the claims handling process, such as: Bankruptcy of the principal Claims for extra-contractual damages Claims by the surety against the principal Indemnity for losses sustained by the surety The interrelationship of the surety and the insurance carriers for the construction project Valuable analysis of case law is included within the discussion of each topic, and the relevant facts of key cases are highlighted where applicable. Bonus Interactive CD-ROM Includes All Forms and Documents This unique CD-ROM contains nearly 150 forms, such as sample agreements and correspondence among the parties, providing the guidance you need to act quickly and protect your client's interests in any situation. This authoritative and highly specialized text contains detailed analysis and guidance on UK insurance claims for practitioners. The book adopts a modern, accessible approach which makes retrieval of information fast and convenient. This third edition gives an accurate summary of the UK's law as it relates to insurance claims, including claims against insurers and insurance brokers. It includes the following developments in UK law since the previous edition: notification of claims and circumstances following *Kajima and Kidsons* \* developments in relation to damages for late payment by insurers \* establishing the basis of the insured's liability to a third party following *Omega Proteins v Aspen Insurance* \* the relevance of commercial purpose to the construction of policy wordings in the light of the *EL Trigger Litigation* \* waiver and estoppel in relation to procedural conditions following *Kosmar Villa Holidays v Syndicate 1243* \* the Third Parties (Rights Against Insurers) Act 2010 \* the Law Commission's review of consumer and business insurance. Now in a third, revised edition, *Excessive Maritime Claims* by J. Ashley Roach and Robert W. Smith is designed for law of the sea and maritime law specialists.

Coverage includes current affairs in maritime law such as submarine cables, polar areas, environmental protection, sovereign immunity and sunken ships, and maritime law enforcement, maritime security, proliferation of weapons of mass destruction by sea, piracy, and protection of underwater cultural heritage. This new edition is a practical guide on undertaking compensation claims for abuse Praise for the Second Edition . . . "A basic, how-to guide . . . for all those involved in the construction industry."--The Construction Lawyer "This book is indispensable for any contractor who, against his better judgment, bids a fixed price contract . . . highly recommended."--David S. Thaler, The Daily Record "Particularly useful to the construction contractor [and] also instructive to owners and design professionals."--Journal of Performance of Constructed Facilities "Practical advice on how to prevent a dispute--from the moment that the contract preparation begins through performance by the contractor and administration by the owner."--Concrete International Over two successful editions, Construction Claims has become the sourcebook of choice on the subject for construction professionals from all areas of the industry. Now extensively updated, the Third Edition includes new material on design/build implications for construction; dispute review boards and their proper use; partnering to avoid disputes; and federal and relevant state environmental regulations. Written by a prestigious and experienced author team, it uses an accessible, step-by-step approach that follows the contracting process from start to finish, with detailed coverage of provisions of the law, "red flag" contract clauses, and documentation issues and procedures. It also addresses the key aspects of prosecuting and defending claims, from claims presentation to formal dispute resolution. Complete with dozens of new forms and checklists, plus case histories, mini-cases, and more, this edition is an essential resource for anyone involved in construction and the law. An important guide to the quantification of contract claims in the construction industry, updated third edition The

substantially expanded third edition of Evaluating Contract Claims puts the spotlight on the quantification of claims in the construction industry after liability has been established, including by reference to the terms of several standard forms of contract in common use. The authors clearly demonstrate the potential alternative approaches to quantification, the processes, principles and standard of analysis required to produce acceptable claims for additional payment. The third edition covers a number of heads claims not considered in previous editions and offers an important guide for those working with building or engineering contracts. Evaluating Contract Claims explains in detail how the base from which evaluation of additional payments may be established, the effect of changes on the programme of work and the sources of information for evaluation of additional payments. The book also contains information for evaluating the direct consequences of change in terms of the impact on unit rates, and evaluating of the time consequences of change in terms of prolongation, disruption, acceleration and more. This important book: Concentrates on the quantification of contract claims after liability has been established Offers a guide that is appropriate for any form of contract Considers the potential alternative approaches to quantification of different heads of claim Contains the principles and methods that should be reflected in the evaluation of claim quantum Includes the standard of substantiation which may be required Presents information that is equally applicable in both building and engineering disputes Is substantially expanded from its previous editions Written for construction and engineering contract administrators, project managers, quantity surveyors and contract consultants, Evaluating Contract Claims offers a revised third edition to the essential guide for quantifying claims in the construction industry once liability has been established. The second edition of Construction All Risks Insurance will be essential reading for both lawyers and insurance brokers in the field of construction

insurance. Building on its reputation as the definitive reference for practitioners, and updated with respect to the Insurance Act of 2015, Construction All Risks is the go-to guide looking for answers in construction insurance. Construction Delays, Third Edition, provides the latest specialized tools and techniques needed to avoid delays on construction projects. These include institutional, industrial, commercial, hi-rise, power and water, transportation and marine construction projects. Most other references provide only post facto construction delay analysis. This update includes 18 chapters, 105 sections and approximately 100 new pages relative to the second edition. Features greatly expanded discussion of the project management concerns related to construction delays, including a more comprehensive discussion of the development and review of the project schedule. Offers a detailed analysis of the strengths and weaknesses of the most common construction delay approaches and how they should be properly deployed or avoided. Includes significant discussion of the contract provisions governing scheduling, the measurement of delays and payments for delay. Includes numerous real world case studies. In September 1999, FIDIC introduced its new Suite of Contracts, which included a "new" Red, Yellow, Silver and Green forms of contract. The "new" Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms.

specified in them. Important features of this book include:

- background and concepts of the various forms of contract;
- a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose;
- analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned;
- a range of 'decision tree' charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards;
- a much enlarged discussion of the meaning of "claim" and "dispute" and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submission of claims by a contractor and by an employer;
- the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and
- five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

From the creation of the schedule to the successful conclusion of the project, *Construction Scheduling: Preparation, Liability, and Claims, Third Edition* provides the most complete and practical resource on the major elements of the construction scheduling life cycle you and'll find anywhere. The contract negotiation and scheduling techniques described in this indispensable resource show you how to deal with all scheduling contingencies, and how to formulate your documentation accordingly. By integrating and "how to and" information with legal background, *Construction Scheduling* strikes home the importance of proper scheduling. Its solid analysis and demonstration techniques strengthen your position at the bargaining table and in court. You and'll learn how to:

- Identify your strengths and weaknesses in any scheduling negotiation

Quantify damages resulting from delay Choose the right scheduling method Juxtapose and “as built and” against critical path method schedules Determine compensable delays and your recourse Negotiate delay impacts to a reasonable assessment Factor in owner and contractor expenses with formulas backed by precedents Gain compensation from the impossible including government-involved concurrent delay Navigate the issue of and “side switching and” to avoid having your expert disqualified to testify Time-saving tools free up your schedule! Construction Scheduling: Preparation, Liability, and Claims, Third Edition saves you countless hours of research by providing instant access to valuable resources like these: A compendium of federal scheduling specifications that provides clauses developed to combat a variety of software-user abuses A specific and ‘cookbook and’ on expert and’s conduct and the examination of Daubert principles to scheduling experts Actual case histories and model projects, with problems provided for training purposes A practical, step-by-step guide on how to prepare and respond to construction claims. Everyone involved in the preparation or review of construction claims should have this book to hand. The book examines the different types of claim common to construction contracts and presents a step-by-step guide to demonstrate the process of building up a fully detailed claim submission. It includes advice on: Contract administration for claims and claims avoidance. Identifying the various types of claim. The key points for an effective claim or response document. The essential elements to be included in a claim or response. Extension of time claims. Claims for additional payment. Principles of delay analysis. Quantum calculations. Responses and determinations to achieve agreement and avoid disputes. A note on dispute boards. The advice given in the book is supported by worked examples of typical claims and responses with sample wording. The book includes a foreword by Roger Knowles, who says: “The book is without a doubt fully comprehensive and goes through the preparation of a

claim from A to Z. I have no hesitation in recommending it to students, beginners, those involved on a day-to-day basis with time and cost on projects, as well as the seasoned claims consultants". This book is suitable for contracts managers, commercial managers, project managers, quantity surveyors, engineers and architects. Kevin L. Glaser has been involved in the insurance industry for some 30 years, having been involved on the company side in underwriting and claims, and currently serves as a consultant, risk manager, and expert witness on insurance related issues. With his book, *Inside the Insurance Industry*, Glaser uses his in-depth knowledge of the industry to explore the truths and myths of insurance. He gives readers a glance at what the insurance industry is really like - including how to get through the industry jargon to get the best deal for your insurance dollar, and what the agents and brokers aren't telling you. New to the second edition: a new chapter on insurance litigation, updated claims department information, and much more. *APIL Clinical Negligence* focuses on the key and developing areas of clinical negligence, including medical product claims. It combines know-how about conducting these claims with the latest thinking on new and developing areas of practice. This new edition has been substantially revised to take account of: Consent - the impact of *Montgomery and Webster*; Damages - the discount rate; *Roberts v. Johnstone*, etc; Mediation - the new NHS Resolution agreement; Case management and costs budgeting; Product liability - update on the test for defect and causation. Contents include: Coping with Trauma; NHS Complaints Procedure and Redress; the Funding of Clinical Negligence Claims; Medical Treatment and Human Rights; the Duty of Care, Standard of Care and Establishing Breach of Duty; Claims Involving Medical Products; the Clinical Negligence Pre-Action Protocol; Instructing an Expert: A Medic's Perspective; Part 36 Offers; Mediation and ADR; Entitlement to Damages; and more. Many building contract claims are ill-founded, often because the basic principles are

misunderstood. This highly regarded book examines the legal basis of claims for additional payment, and what can and cannot be claimed under the main forms of contract. It includes chapters dealing with direct loss and expense, liquidated damages, extension of time, concurrency, acceleration, time at large, common law and contractual claims, global claims, heads of claim and their substantiation. The new fourth edition has been substantially restructured and updated. Nearly 100 additional cases have been added as well as four new contracts: the JCT Construction Management and Major Project contracts, the JCT Standard Form of Domestic Subcontract, and the Engineering and Construction Contract (the NEC Form). The book continues to use the JCT Standard Form (JCT 98) as the basis of the text, with important differences highlighted in the other forms. Seventeen forms are dealt with and they have all been updated since the last edition of this book. This new edition is essential reading for architects, contract administrators, project managers and quantity surveyors. It will also be invaluable to contractors, contracts consultants and construction lawyers. David Chappell BA(Hons Arch), MA(Arch), MA(Law), PhD, RIBA has 45 years' experience in the construction industry, having worked as an architect in public and private sectors, as contracts administrator for a building contractor, as a lecturer in construction law and contract procedures and for the last fifteen years as a construction contract consultant. He is currently the Director of David Chappell Consultancy Limited and frequently acts as an adjudicator. He is Senior Research Fellow and Professor in Architectural Practice and Management Research at the Queen's University, Belfast. He was appointed Visiting Professor in Practice Management and Law at the University of Central England in Birmingham from 1 March 2003. David Chappell is the author of many articles and books for the construction industry. He is one of the RIBA Specialist Advisors and lectures widely. Vincent Powell-Smith LLM, DLitt, FCI Arb was a practising arbitrator and formerly Professor of Law at the

University of Malaya and the International Islamic University, Malaysia. He was author of many books on construction law. John Sims FRICS, FCI Arb, MAE, FRSA is a chartered quantity surveyor now practising as a consultant, arbitrator, adjudicator and mediator in construction disputes. He is author of a number of books on building contracts and arbitration. Also of interest Building Contract Dictionary Third Edition David Chappell, Derek Marshall, Vincent Powell-Smith & Simon Cavender 0 632 03964 7 The JCT Minor Works Form of Contract Third Edition David Chappell 1 4051 1523 8 Parris's Standard Form of Building Contract Third Edition David Chappell 0 632 02195 0 The JCT Major Project Form Neil F. Jones 1 4051 1297 2 Evaluating Contract Claims R. Peter Davison 1 4051 0636 0 Construction Adjudication Second Edition John L. Riches & Christopher Dancaster 1 4051 0635 2 The Arbitration Act 1996 A Commentary Third Edition Bruce Harris, Rowan Planterose & Jonathan Tecks 1 4051 1100 3 In preparation The NEC and JCT Contracts Compared Deborah Brown 1 4051 1823 7 Cover design by Workhaus Written by an impressive team of specialist contributors, Insurance Dispute is the authoritative guide to litigation for both the insurer and the insured. Divided into two parts - principles of law and their practical use in individual types of insurance, it aims to identify and resolve questions such as: • How should the claimant handle a dispute? • Is the claim within the cover? • When should an insurer dispute cover? • What steps can an insurer take to deny cover? Updated and revised to include new chapters on marine insurance, the Financial Ombudsman Service and ATE insurance, Insurance Disputes is essential reading for anyone involved in insurance law and litigation. The APIL Guide to Occupational Illness Claims is a practical handbook designed for all those involved in this area of specialist personal injury litigation. It is a one-stop source of reference, which provides: \* an outline of the myriad statutory provisions which regulate this area and the effective date of those provisions, helping you to identify which provision

was in force at the date of exposure\* the nature and medical background to common occupational illnesses\* an explanation of the problems associated with complicated expert evidence\* practical advice on pursuing and valuing the claim, the procedure for restoring companies to the register, etc.\* expertly drafted precedents, draft schedules of damages and model pleadings

The new edition of APIL Guide to Occupational Illness Claims has been completely rewritten by a team of specialist personal injury lawyers, taking into account major changes in law and practice since the second edition of this book. 'Delay and Disruption Claims in Construction', third edition is a concise practical guide to the process of delay and disruption presentation and evaluation of claims. The work covers the basics of contract law, breaches of contract, delay and disruption, and resulting loss and expense. It also contains real life case studies with detailed analysis and assessment of the claims presented which offer a practical guide to the presentation of claims. This title is designed for law of the sea and maritime law specialists. The coverage includes current affairs in maritime law such as submarine cables, polar areas, environmental protection, sovereign immunity and sunken ships, and maritime law enforcement. Express permission is made in the various ICE forms of contract, and in the CECA forms of subcontract, for claims by the contractor for reimbursement of additional costs and for allowance of additional time to compensate for events that were not foreseeable at the date of the contract. In addition, claims may be made for damages for breach of contract, where the employer or his engineer is in default of his obligations under the contract. But the application of clauses giving rights to such compensation or damages is frequently misunderstood, with the result that the notices and records necessary for a claim to succeed are often not available. This, the third edition of an essentially practical book, explains the legal requirements of a successful claim, and the actions that should be taken by the contractor when

difficulties arise that give him a right to reimbursement or to an extension of time, or, more usually, both. Similarly, actions are explained that should be taken by the employer and by his engineer in resisting unjustified claims. This edition covers both the Fifth and the Sixth Editions of the ICE Conditions, the Minor Works Conditions, and the Design and Construct Conditions. New features include a chapter on the New Engineering Contract and the CECA Forms of Subcontract. Examples of claims submissions are included, and a number of recent cases have been considered. The 4th edition of Excessive Maritime Claims updates material on state practice of the law of the sea since publication of the 3rd edition in 2012 and adds new material on islands and other maritime features. Most medium to large construction contracts include a claim for extra payment for variations and changes or for disruption to the programme. A number of books address the legal and contractual basis for such claims, but few if any show how such claims should be quantified. This book will provide a detailed guide to evaluating such claims, showing how they are priced and how a valid claim is prepared. The work is broken down into 26 accessible chapters, each focusing on a particular aspect of RTA liability. The narrative chapters are accompanied by useful materials and precedents. This new edition will be thoroughly updated to include coverage of developments in law and practice. Now in a third, revised edition, Excessive Maritime Claims by J. Ashley Roach and Robert W. Smith is designed for law of the sea and maritime law specialists. Coverage includes current affairs in maritime law such as submarine cables, polar areas, environmental protection, sovereign immunity and sunken ships, and maritime law enforcement, maritime security, proliferation of weapons of mass destruction by sea, piracy, and protection of underwater cultural heritage. What Is an Adjuster? An "adjuster" or "insurance adjuster" is, by statutory definition, a person, co-partnership or corporation who undertakes to ascertain and report the actual loss to the

subject-matter of insurance due to the hazard insured against. Insurance companies create, by issuing an insurance policy, a contractual obligation to pay valid claims from those insured. To do so insurers understand that the person insured is not able to prove the cause and extent of loss without assistance. Therefore, insurers dispatch a person with special knowledge - the adjuster - to separate fact from fiction, to establish cause and origin of the claimed loss, and determine sufficient information to enable the insurance company to determine the amounts necessary to indemnify the insured as the policy promised. The adjuster is also present to distinguish the valid claim from a claim for which the insurance company is not liable under its policy, whether due to the terms and conditions of the policy or because of attempted fraud. Some policies, like those issued under the National Flood Insurance Program Act (NFPA) specifically state that the claimant must use his own judgment in estimating the amount of loss and that the assistance of an insurance adjuster is a "courtesy only." The insured must still send a proof of loss within 60 days after the loss even if the adjuster does not furnish the form or help the insured complete it. Most insurance policies issued by commercial - non government supported - insurers accept substantial compliance with the policy conditions and require their adjusters to assist the insureds to fulfill the conditions. The insurance adjuster is seldom, if ever, mentioned in a policy of insurance. The strict wording of the first party property policy sets the obligation to investigate and prove a claim on the insured. In order to fulfill the covenant of good faith and fair dealing insurers created the insurance adjuster to fulfill its obligation to deal fairly and in good faith with the insured. The adjuster was created to assist the insured to comply with the material conditions of the policy, to thoroughly investigate the policy and the claim, and to protect the interest of the insurer and protect against claims that were not due to a peril insured against or were false and fraudulent. In the UK, the management of catastrophic injury

claims is complex. These claims involve: detailed and ongoing care and rehabilitation regimes; sophisticated case management involving technical procedural matters, often involving the Court of Protection; significant use of expert evidence; as well as complicated settlement and financial structures, including periodical payment orders. Involving numerous experts of different disciplines, these claims require the practitioner to 'marshal' and manage the team, as well as particular requirements regarding client care. This book provides a guide to best practice in the complex area of UK catastrophic injury litigation. The text provides guidance on case management, practical help in dealing with and addressing issues of expert evidence, an in-depth discussion of damages, and an analysis of relevant primary source material. This second edition includes new chapters on periodical payments, neuro-rehabilitation, birth injuries, and radiology. It also examines the impact of the Jackson reforms, cost budgeting, and developments in the Court of Protection's jurisdiction. This book is written in an easy-to-understand format that allows people with limited insurance experience to better understand various areas in the insurance industry. It contains just the right mix of broad and specific information. Insurance Claims provides an accurate summary of the law as it relates to insurance claims, which means largely, but not exclusively, claims against insurers and insurance brokers. It is aimed at those involved in the application of the law on a daily basis, whether as solicitors, barristers or insurance claims handlers. The new edition is one of the first titles to cover and offer detailed commentary on the Insurance Act 2015 which comes in to force in August 2016. Insurance Claims, Fourth Edition includes coverage of the following significant changes in legislation and case law: The Insurance Act 2015 comes into force on 12 August 2016 and makes far-reaching changes to insurance law in England and Wales: Introduces a new pre-contractual duty of fair presentation in place of the duty to disclose material facts/duty not to

misrepresent material facts; Makes significant changes to remedies for breach of pre-contractual duty, breach of warranty and breach of other terms 'not relevant to the actual loss'. The Enterprise Act 2016 amends the Insurance Act 2015 and introduces a general right to damages for late payment of insurance claims (with effect from 4 May 2017). The Third Parties (Rights Against Insurers) Act 2010, is amended by the Insurance Act 2015 and by the Third Parties (Rights Against Insurers) Regulations 2016, and comes into force on 1 August 2016. The Consumer Rights Act 2015 re-enacts, with minor changes, the law on unfair terms in consumer contracts (formerly the Unfair Terms in Consumer Contracts Regulations 1999). *Teal v Berkley* in the Supreme Court on the order in which losses are allocated to policies of insurance. *Aspen v Adana* in the Court of Appeal on the meaning of 'product' and cover for defective installation in product and public liability insurance. *International Energy Group Ltd v Zurich Insurance plc* in the Supreme Court on contribution between insurers in cases within the 'Fairchild enclave'. *AIG v ILP* in the Court of Appeal on aggregation in solicitors' indemnity insurance. Contents: 1: The Basics; 2: The Claimant; 3: The Contract of Insurance; 4: Causation of Loss; 5: Proof of Loss; 6: Measurement of Loss; 7: Presentation of Claims; 8: Claims Handling; 9: Insurance Litigation; 10: Alternatives to Litigation; 11: Insurers' Defences; 12: Subrogation; 13: Double Insurance and Contribution; 14: Reinsurance; 15: Conflict of Laws; 16: Claims Against Insurance Brokers; 17: Specific Types of Insurance.
