The book presents a decade-long perspective on contemporary visual practices in India, with stunning visuals and insightful essays by leading intellectuals in the field. Engaging with a diversity of art practices and creative conditions, the publication (and exhibition) questions cultural structures that segregate visual practices, making a case for a polycentric aesthetic. In this argument for an inclusive and non-hierarchical consideration of visual culture, *Edge of Desire* presents a new contribution from the sub-continent to the debate on the nature and purpose of art practices and art histories. At the same time, it offers a visually exciting and intellectually stimulating array of new art from India generated through an intermingling of influences and traditions. Are works of art imitations? If so, what exactly do they imitate? Should an artist remind his audience that what it is perceiving is in fact artifice, or should he try above all to persuade it to accept the illusion as reality? Questions such as these, which have dominated aesthetic theory since the Greeks, were debated with extraordinary vigour and ingenuity in eighteenth-century France. In this book Dr Hobson analyses these debates, focusing in turn on painting, the novel, drama, poetry and music. In each case she relates theory to contemporary works of art by Watteau, Chardin, Diderot, Beaumarchais, Gluck and many others. She shows that disputes within the theory of each art centred upon the nature of the perceiver's attention. Dr Hobson provides a method of mapping the changes in artistic style which took place as the century advanced. In discussing such conceptual transformations Dr Hobson opens an important perspective for the study of Romanticism and Realism. The years 1890-1900 were rich and varied ones for the art of the illustrated book in Britain. This is an interesting, as well as controversial, exploration of what art is and why it is valuable. Young reflects on the essence of art and argues

that it provides insight into human nature. This text will be of interest to all philosophers. The Philosophy of Fine Art is regarded by many as one of the greatest aesthetic theories to have been produced since Aristotle. Hegel's thesis about the historical dissolution of art has been the subject of much scholarly debate. Hegel develops his account of art as a mode of absolute spirit that he calls "the beautiful ideal." Christianity has repeatedly valued the "Word" over and above the non-verbal arts. Art has been seen through the interpretative lens of theology, rather than being valued for what it can bring to the discipline. 'Explorations in Art, Theology and Imagination' argues that art is crucially important to theology. The book explores the interconnecting themes of embodiment and incarnation, faith and imagination, and the similarities and differences between art and theology. Arguing for a critique that begins with art and moves to theology, 'Explorations in Art, Theology and Imagination' offers a radical re-evaluation of the role of art in Christian discourse. Provides a foundation for understanding the fascinating field of seismic processing. Written for the non-expert, this two-volume introductory text reveals the limitations and potential pitfalls of seismic data, prepares both seismic interpreters and acquisition specialists for working with seismic processing geophysicists, and much more. Heritage Edition—Over 100 illustrations of a century ago. Unabridged, original text consisting of inspiring and profound lessons from the stories and parables which Jesus told. Christ the Great Teacher gave much of His instruction as He walked with His disciples through the hills and valleys of Palestine or rested by the lake or river. In His parable teaching He linked divine truth with common things and incidents, as may be found in the experiences of the shepherd, the builder, the tiller of the soil, the traveler, and the homemaker. Familiar objects were associated with thoughts true and beautiful—thoughts of God's loving interest in us, of the grateful homage that is His due, and of the care we should have one for another. Thus lessons of divine wisdom and practical truth were made forcible and impressive. The Scripture says, "All these things spake Jesus unto the multitude in parables; . . . that it might be fulfilled which was spoken by the prophet, saying, I will open My mouth in parables; I

will utter things which have been kept secret from the foundation of the world." Matt. 13:34, 35. Natural things were the medium for the spiritual; the things of nature and the life-experience of His hearers were connected with the truths of the written word. Leading thus from the natural to the spiritual kingdom, Christ's parables are links in the chain of truth that unites man with God, and earth with heaven. In this volume the parables are grouped according to their subjects, and their lessons are developed and illustrated. The book is full of gems of truth, and to many readers it will give a richer meaning to the common surroundings of everyday life.
